

Medical Cannabis Testing Roadmap

Cultivator Testing Requirements

Tests are only considered valid for one (1) year from the testing date. Harvest batches and production batches that pass the transfer testing panel are not required to be retested for those items in their final form if those batches were not physically or chemically altered following the prior sale or transfer.

Test	Requirements
Cultivator	1 Transfer Testing Panel (Raw Plant Material) <input type="checkbox"/> THC + Cannabinoid Concentration <input type="checkbox"/> Residual Pesticides
	2 Full Testing Panel (Raw Plant Material) <input type="checkbox"/> THC + Cannabinoid Concentration <input type="checkbox"/> Terpenoid Type + Concentration <input type="checkbox"/> Residual Pesticides <input type="checkbox"/> Heavy Metals <input type="checkbox"/> Microbial Impurities <input type="checkbox"/> Mycotoxins <input type="checkbox"/> Water Activity <input type="checkbox"/> Yeast + Mold
	3 Remaining Testing Panel (Raw Plant Material) <input type="checkbox"/> Terpenoid Type + Concentration <input type="checkbox"/> Heavy Metals <input type="checkbox"/> Microbial Impurities <input type="checkbox"/> Mycotoxins <input type="checkbox"/> Water Activity <input type="checkbox"/> Yeast + Mold

Test	Description
Cultivator	1 Required to transfer non-finished, bulk, raw plant material from a licensed cultivator to another licensed cultivator or licensed processor.
	2 Required for raw plant material finished goods that have not previously had Cultivation Test 1 conducted.
	3 Required for raw plant material finished goods that have previously had Cultivation Test 1 conducted and have not undergone any additional physical or chemical changes following transfer.
