

Quick Reference Guide for Kentucky Designated Caregivers

Application and purchasing process

1 Verify patient eligibility

A designated caregiver may only apply if their **assigned patient has been approved** for a registry ID card. If the caregiver applicant is the parent or guardian of a minor patient, the caregiver applicant must be approved before the minor's ID card becomes valid.

2 Submit an application

A designated caregiver must **apply for a registry ID card** through the patient and caregiver registry portal and provide:

- Patient registry ID number
- Attestations to perform caregiver duties
- Signed and notarized signature form
- Application fee

An application **must be submitted for each registered qualified patient** who designated the applicant as a caregiver

3 Receive a registry ID card

The Cabinet will approve or deny the application within 30 days of receiving a completed application. If the application is approved, the designated caregiver will receive a **digital registry ID card**, which must be printed or saved on a mobile device.

4 Purchase medical cannabis products

A designated caregiver must **purchase medical cannabis for their qualified patient(s)** at a licensed dispensary and the following purchase options may also be available at licensed dispensaries:

- Delivery service
- Curbside pickup
- Drive-thru window

Additional information
